## Tutoring Experience

Over the past 13 years, I have taught students from a wide range of academic backgrounds, including those preparing for IB Maths and A-Level exams. My experience includes working with both individual students and larger groups, ensuring that each student reaches their full potential in mathematics.

I have worked with international students, helping them build a solid foundation in mathematics that can be applied to other academic areas. Through my tutoring, many of my students have been accepted into top universities, achieving impressive results in their final exams.

In addition to school-level tutoring, I have guided undergraduate students through advanced topics such as calculus, algebra, and geometry. My teaching has consistently helped students improve their grades and confidence in math.
